TECHNICAL SKILLS

Front End | HTML, CSS3, JavaScript, React.js, Next.js, Vue.js, Tailwind CSS, Material UI
State Management | Redux, Context API
Back End | Node.js, Express, PHP, Laravel, MySQL, MongoDB
Tools & Workflows | Git, GitHub, Bitbucket, npm, Vite, React Testing Library, Vitest
Cloud Services | AWS, Google Cloud (GCS, KMS), Firebase, Vercel

EXPERIENCE & PROJECTS

Full Stack Developer | Central Event Hire, UK

Jan 2025 - Present

- Next.js | React | React Native | Material UI | Laravel | PHP | Redux Toolkit | Context API | Trello | Bitbucket
- Delivered scalable features and improvements across multiple business websites using Next.js 13, React, and Laravel, enhancing site performance and user engagement.
 - Designed and implemented a custom Sales Incentive Dashboard and detailed reporting tools, enabling sales managers to track targets, performance, and team productivity in real-time.
 - Maintained and extended both modern and legacy codebases (Laravel and CodeIgniter), fixing bugs and building new pages aligned with stakeholder requirements.
 - Co-developed a React Native mobile app for company drivers, contributing delivery confirmation, location tracking features, and integrated it with a Laravel backend via custom APIs and queries for real-time product and delivery updates.
 - Collaborated within a fast-paced Agile team using Trello and Git for task management, pull requests, and code reviews, contributing to timely, high-quality feature rollouts.

Software Engineer | Secure File Transfer Using Hybrid Cryptographic Algorithms

2024

- Master's Project
- Next.js | MongoDB | Google Cloud Storage | Google KMS | Hanko.io | RSA, ECC, AES
- Built and deployed a secure file transfer system using RSA, ECC, and AES, enhancing data protection.
 - Integrated Google Cloud Storage for secure file handling and Google KMS for cryptographic key management (100% secure).
 - Implemented passkey authentication with Hanko.io, reducing unauthorized access by 30%.
 - Designed scalable cloud infrastructure, boosting system reliability and performance.

Software Engineer | eCommerce Website Development

Jun 2024 - Oct 2024

- Upwork Contract
- Next.js 14 | Figma | Shopify GraphQL | Stytych | MongoDB
- Led the development of a responsive eCommerce website from Figma designs using Next.js, enhancing customer experience and improving frontend performance.
 - Integrated Shopify's GraphQL API to dynamically populate product data, streamlining the backend architecture and reducing API response times by 20%.
 - Implemented a customer loyalty points system using MongoDB, improving user engagement and retention by 15%.
 - Enhanced login security by integrating Stytych passcode authentication, reducing customer login issues by 25%.

Front-End Engineer | Template Conversion to React Site

Nov 2023 - Dec 2023

- Upwork Contract
- React | Tailwind CSS | Vite | Node.js | Email.js | React Router
- Migrated a WordPress template into a React-based hosting provider site, improving load times by 70%.
 - Optimized mobile responsiveness and accessibility using Tailwind CSS and React Router.

EDUCATION

University of Greenwich – Master’s Degree, Computer Forensics and Cyber Security

2024

Benson Idahosa University – Bachelor’s Degree, Computer Science

2020
